ZENZELE MANUFACTURING PRODUCT BRAND

Gunric Valves is a leading manufacturer and supplier of metal seated triple offset butterfly valves for the water, mining, gas, industrial and power generation industries.

In October 2017, Zenzele Valves Manufacturing acquired the Gunric Valves brand. This strategic investment enabled the Zenzele Valves Group to extend its manufactured product range to include large diameter and high pressure triple eccentric butterfly valves, metal seated tilting disc check valves and industrial dampers.

Zenzele Valves Manufacturing's metal seated butterfly valve is available in sizes up to DN2500 and pressures up to PN63. The design was first developed in South Africa - nearly 30 years developed in South Africa - nearly 30 years achieve precise contact between disc seat and body seal in the full shut off position - without any rubbing or gauling.

It is this bi-directional tight shut off feature that enables it to achieve a long, low maintenance service life in general water applications, as well as providing optimal performance and durability in severe service process environments.

Zenzele Valves Manufacturing's metal seated tilting disc check valves are available in sizes up to DN2500 and pressures up to PN40, whilst its range of custom made industrial dampers can be offered up to DN3000.

TRIPLE ECCENTRIC HIGH PERFORMANCE BUTTERFLY VALVES

Incorporating tri-centric sealing geometry, the laminated stainless steel or solid metal seal of the Zenzele Valves Manufacturing Valve provides bubble tight shut-off within a wide range of temperatures and pressures. The seal is held in position by a bolt-on retaining ring, and, together with the seat ring, is easily replaceable.

METAL SEATED TILTING DISC CHECK AND DAMPER VALVES

The Zenzele Valves Manufacturing range of tilting disc check valves feature eccentric shafts and metal-to-metal sealing. This ensures the tight shut-off and efficient handling of various mediums. valves are manufactured for installation in horizontal and vertical pipelines. Optional external hydraulic damper cylinders can be fitted to prevent the disc from slamming shut, ensuring smooth closing.

PRODUCTS

TRIPLE ECCENTRIC METAL SEATED BUTTERFLY VALVE

METAL SEATED TILTING DISC CHECK VALVE

DAMPER

SERIES NO.	61/45	61/46	61/47
DESCRIPTION	Gunric Triple Eccentric Butterfly Valve	Gunric Tilting Disc Check Valve	Butterfly Step Seat Design, 98% Shut off by volume
APPLICATIONS	Water, Waste Water, Cooling Water, Mine Water, Chemicals, Steam and Gas	Water, Waste Water, Cooling Water and Mine Water	Hot air, gas and steam
MAIN FEATURES	Bubble Tight Shut, Fire Safe Certified Design, High Cycle, High Performance, Large Diameters, ISO 5211 Mount	Metal to Metal Seal, Drip Tight Shut Off, Horizontal and Vertical Installation, Auto closing, Assisted Closing	Custom made design for application
SIZES	80mm to 2500mm	80mm – 2500mm	100mm – 3000mm
OPTIONS	Seals available in - Laminated metal - Solid metal - PTFE - ANSI B16.10 Corrosion protection Carboline 891 - 250 micron, S/S welding on blade edge, Actuators, Gearboxes, Packaging, Ex-Works Price	Hydraulic Cylinder, Step Seat Design, Lever with counter weight(s), Integral or replaceable seat	Gearbox, Pneumatic or Electric actuation
VALVE RATING	PN2.5 – PN250, Class 125 to Class 1500	PN 2.5 – PN 40	PN 2.5 to PN 40
TEMPERATURE RANGE	-35°C to +1000°C	-35°C to +425°C	-35°C to +1000°C
BODY MATERIALS	Available in steel, ductile iron, stainless steel, nickel alloys, fabricated and castings available	Available in steel, ductile iron, stainless steel, nickel alloys, fabricated and castings available	Fabricated Mild Steel, Stainless Steel and Duplex Stainless Steel
APPLICABLE STANDARDS	BS EN 593, BS EN 1092, DIN 2630 – 2638, ANSI B16.5, API 605, API 609 & AWWA C207	BS EN 593, BS EN 1092, DIN 2630 – 2638, ANSI B16.5, API 605, API 609 & AWWA C207	Manufacturers Standard

METAL SEATED TRIPLE ECCENTRIC BUTTERFLY VALVE

Face to Face According to BS EN 593, ANSI B16.10, Flange drilling can accommodate BS EN 1092, DIN 2630-2638, ANSI B 16.5 API 605, B16.47, API 609 & AWWA C207. Pressure test according to BS EN 593

Double Flanged Triple Eccentric Butterfly Valve Materials.

Body & Disc: Fabricated carbon steel S355Jr, S.G. Iron BS2789 Gr.420, Cast Steel A216 WCB. Also Stainless Steel & Nickel Alloys

Shaft: Stainless Steel: 431(EN57)

Bearing bush: Glacier DU, Stainless Steel 316 (Chrome Carbide), Phosphor Bronze

Seal Ring: Laminated Stainless Steel

Seat Ring: Stainless Steel 304

Retaining Ring: Stainless Steel 316

Actuation: Valves are generally fitted with worm gearboxes for manual operation. They can also be fitted with electric, pneumatic or hydraulic actuators to suit output drives in accordance with ISO 5211.

METAL SEATED TRIPLE ECCENTRIC BUTTERFLY VALVE SERIES 61/45

REFERENCES

Whether high operating pressures, demanding operating cycles or extreme temperatures Gunric supplies valves across the world.

72" Butterfly Valve at -50°C

Gunric Valves supplied a refinery in Kazakhstan with valves with steam tracing capabilities to help prevent valves from cracking during plant shutdown in winter.

1350mm Metal Seated Butterfly Valve at 950°C

Gunric Valves supplied a platinum smelter with a valve for operation in a gas furnace at a temperature of 950° Celsius.

CL 1 500 Butterfly Valves for Steam Application

Gunric Valves supplied 3 of the world's highest pressure 30" valves for a steam application at 117 bar in Saudi Arabia. These valves are designed to operate at over 519° Celsius.

Butterfly Valve Tested to 500 000 Operating Cycles

To help avoid maintenance at water depths of over 40m, Gunric Valves manufactured a triple-eccentric butterfly valve to last well over 50 years at a dam in Aachen, Germany. By opening and closing 4 times a day, this will eventually amount to over 500 000 actuations.
